# Why Do You Need a SIM in Security Solutions?

## Continuous Connectivity

RISCO SIM card in your security system ensures constant connectivity, which is crucial for real-time monitoring and instant alerts. While in some cases Wi-Fi or IP can be unstable due to network failures, mobile connectivity via RISCO SIM card remains reliable, as it utilises the best mobile provider in your area.

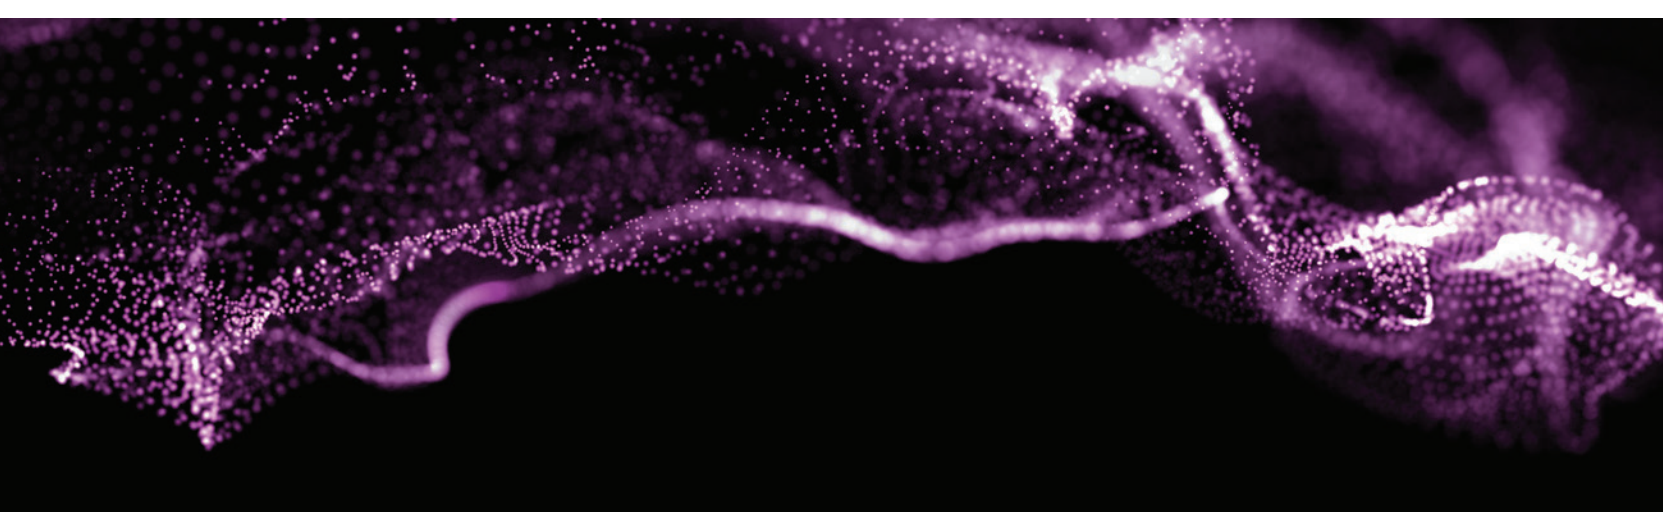

## Remote Monitoring and Control

With RISCO SIM, security systems can send alerts to the iRISCO app or monitoring service; all facilitated through the ultra-secure RISCO Cloud. This enables you to monitor and control your security system remotely, giving you peace of mind and the ability to respond quickly to any security breaches, no matter where you are.

## Backup Communication

RISCO SIM card acts as a backup communication channel. In case of a power outage, your security system can still operate and communicate via the mobile network, ensuring that your security is never compromised.

We offer **TWO** types of plans:

### PLUS 1 **CONNECT**

**£99.99** /year

\*Price depends on currency conversion rate.  
RISCO reserves the right to change the Fees at any time without notification.

## Convenience with **Installer-Provided SIM Cards**

Instead of going through the hassle of sourcing a SIM card from your local provider, you can simplify the process by obtaining it directly from us. Here's why this approach is beneficial:

### **Professional Setup**

We ensure that the SIM card is correctly configured and integrated with your RISCO security system.

### **Tailored Packages**

Select the appropriate package based on your requirements: one for data only and the other for data and voice if you intend to utilise voice technology.

### **Cost Saving**

Get the SIM Card from us, and we will make sure you only pay for the data your system will use.

### **Ongoing Support**

In addition to our services, we also offer ongoing support to provide you with continuous assistance.

By obtaining your SIM card directly from a professional installer, you gain access to a more convenient, tailored, and integrated solution, ensuring your security system operates seamlessly and efficiently from day one.
